OBJECTIVE

Full Stack Developer with 1+ years of hands-on experience in React.js, Node.js, Express.js, AWS and React Native. Interested in building reliable and scalable systems, improving code quality, supporting automation, and learning modern SRE practices including testing, collaboration, and AI/ML-assisted operational workflows.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: React.js, Next.js, React Native, Express.js, Tailwind CSS

Backend & Streaming: Node.js, REST APIs, WebSockets, Apache Kafka

Databases & Cloud: Firebase, MongoDB Atlas, PostgreSQL, AWS (S3, CloudFront, Route 53, Amplify and Other services)

Tools: Git, GitHub, Linux/Unix, Postman, Vercel, GitHub Actions (basic)

Concepts: Scalability, Reliability, API Design, CI/CD Concepts, Agile Development, Testing Basics, IT Automation, Basic Machine Learning (K-Means Clustering)

EDUCATION

Vidyavardhini's College of Engineering and Technology

Vasai West

B.E. in Information Technology (CGPA: 7.1), Honors in Cyber Security (CGPA: 7.5)

2022 – 2026

St. John Junior College

Palghar East

12th (Science - PCMB), 76.5%

HACKATHONS & ACHIEVEMENTS

VCET Hackathon

Vasai, India

Secured 2nd Prize among multiple competing teams

2025

- **Technologies:** Kafka, Node.js, Firebase, WebSockets, React, TypeScript, Tailwind CSS, K-Means Clustering
- Built a real-time IoT motor monitoring system processing streaming sensor data using Kafka, enabling live analytics and visualization.
- Implemented machine learning-based clustering (K-Means) and anomaly detection (Z-score) to optimize load scheduling and predict equipment failures.
- Designed a scalable pipeline integrating producer-consumer architecture with Firebase and WebSockets for real-time alerts and data-driven insights.

EXPERIENCE

AVMSmiles | Full Stack Developer, AWS, MongoDB Atlas, Postgresql

Sep 2025 – Present

- Architected the complete system and user flow from scratch, adhering to Agile methodologies for iterative development.
- Deployed the responsive frontend using **AWS Amplify** and **CloudFront** for global content delivery (CDN), managing DNS via **Route 53**.
- Secured backend infrastructure using **AWS PostgreSQL** and **MongoDB Atlas**, utilized **S3** for storage, and implemented robust security protocols.

Orthosquare | MERN Stack, HTML, CSS, PHP, JS, MySQL

Apr 2025 – Present

- Managed the design implementation and successfully created and launched a new website for the organization.
- Collaborated with cross-functional teams to align technical solutions with business requirements and design standards.

Sushirmala Foundation NGO | MERN Stack, Namecheap, Git, GitHub, Vercel

Mar 2024 – Aug 2024

- Built and deployed responsive web apps using React.js and modern front-end tools.
- Improved UI design and performance through collaboration with designers and developers.

FREELANCE PROJECTS

Panchamrut Chemicals | *AWS Amplify, Next.js, AWS DocumentDB, S3*

- Led the migration from a legacy **IndiaMart** storefront to a custom-built platform using **Next.js** (App Router) with dynamic routing and API routes for optimized SEO and performance.
- Designed scalable backend architecture with **AWS DocumentDB** for product catalog and lead management.
- Deployed via **AWS Amplify** with CI/CD and implemented secure image storage using **AWS S3**, including a custom Admin Dashboard for inventory and content management.

Interactive Photography Portfolio | *MERN Stack, GoDaddy, Git, GitHub, Vercel*

Mar 2025

- Advanced UX features including physics-based scrolling, dynamic layout calculations, and seamless transitions.
- Engineered responsive image grid with gesture-based interactions and fluid animations.

PROJECTS

VCET-NSS | *React Native, MongoDB, Node.js, Express.js, Git, GitHub*

- Developed a full-stack Android app using **React Native** for **attendance tracking, event management**, and collaboration.
- Implemented and consumed **RESTful APIs** using **Node.js, Express.js**, and **MongoDB** for seamless data flow.

Vaity | *Next.js, TypeScript, Tailwind CSS, Razorpay, Git, GitHub, Vercel*

- Developed a responsive resort booking app using **Next.js, TypeScript**, and **Tailwind CSS** with secure **Razorpay** payment integration.
- Optimized for performance and **cross-browser compatibility**, deployed via **Vercel**, and managed using **Git & GitHub**.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

National Service Scheme (NSS)

Technical Head – VCET NSS Unit

Elixir – Product Showcase

Technical Head - VCET IT

CERTIFICATIONS

Complete Intro to React, v9 | *Frontend Masters*

AWS For Front-End Engineers | *Frontend Masters*

API Design in Node.js | *Frontend Masters*

Complete Intro to Linux and the Command-Line | *Frontend Masters*

Complete Intro to Databases | *Frontend Masters*

Full Stack for Front-End Engineers | *Frontend Masters*
